Jakarta, Indonesia

## Summary

Backend-focused Software Engineer with 4+ years of experience developing and maintaining enterprise applications using .NET and SQL, primarily for internal and business-critical systems. Strong focus on backend development, system integration, production support, and code quality, with experience in code reviews and mentoring junior developers. Currently building broader system perspective through exposure to Flutter and Azure, with a long-term goal of taking ownership of core backend components.

---

## Experience

### Software Engineer

Kamoro Maxima Integra • Jakarta  
02/2022 - Present

- Developed and maintained enterprise web applications using .NET, focusing on backend logic, performance, and long-term maintainability.
- Took ownership as technical PIC for a key internal business system, handling production issues, troubleshooting, and day-to-day system reliability.
- Contributed to a corporate mobile application by working on core features and backend integration using Flutter, with minor UI adjustments when needed.
- Debugged and optimized existing applications to improve stability and reduce recurring issues.
- Conducted code reviews and supported junior developers to maintain consistent coding standards.
- Worked with stakeholders to translate business requirements into practical technical implementations.
- Participated in Agile Scrum ceremonies, including sprint planning and technical discussions.

### Developer Intern

Kamoro Maxima Integra • Batam  
02/2021 - 02/2022

- Assisted in debugging and maintaining multiple applications to ensure smooth operation.
  - Contributed to enhancing features and improving overall usability across different projects.
  - Collaborated in the UI/UX design process, supporting the creation of intuitive, user-friendly interfaces.
  - Participated in Agile Scrum discussions, gaining early exposure to collaborative development practices.
-
